# CHECKWEIGHER SWD computer software

RADWAG®

Product description:

The program is intended to collect both partial weighing procedures and packed product control complete reports from Radwag checkweighers.

The application can serve many weighing instruments at the same time, enabling automatic segregating and saving loaded weighing procedures in separate databases. It also enables reports generating and exporting data to text format.

Designed for scales:

· dynamic/control, based on TMC head

Functions:

· servicing many weighing instruments at the same time
· program operating in automatic or manual mode, measurements collecting from scale indicators and terminals and sending them to local databases
· segregating collected measurements inside database (MS Access), giving consideration to time and measurement category
· measurements (databases) exporting to CSV text format, with semicolon as records separator
· communication servicing through port RS-232 and Ethernet (TCP)

Minimal hardware requirements:

· Processor 1,2 GHz
· Minimum of HDD 500 MB free space
· RAM 256 MB (reccommended 512 MB)
· OS Windows 2000/XP

Language versions:

Polish, English, Russian.

* NOTE! RADWAG does not sell software "in box". Boxes presented on our Web-site are of virtual characteristic only, and they are not accessible with purchased software. The customer receives purchased software on a CD in special protective cover and the user manual as a brochure.
