ADVANCED WEIGHING TECHNOLOGIES

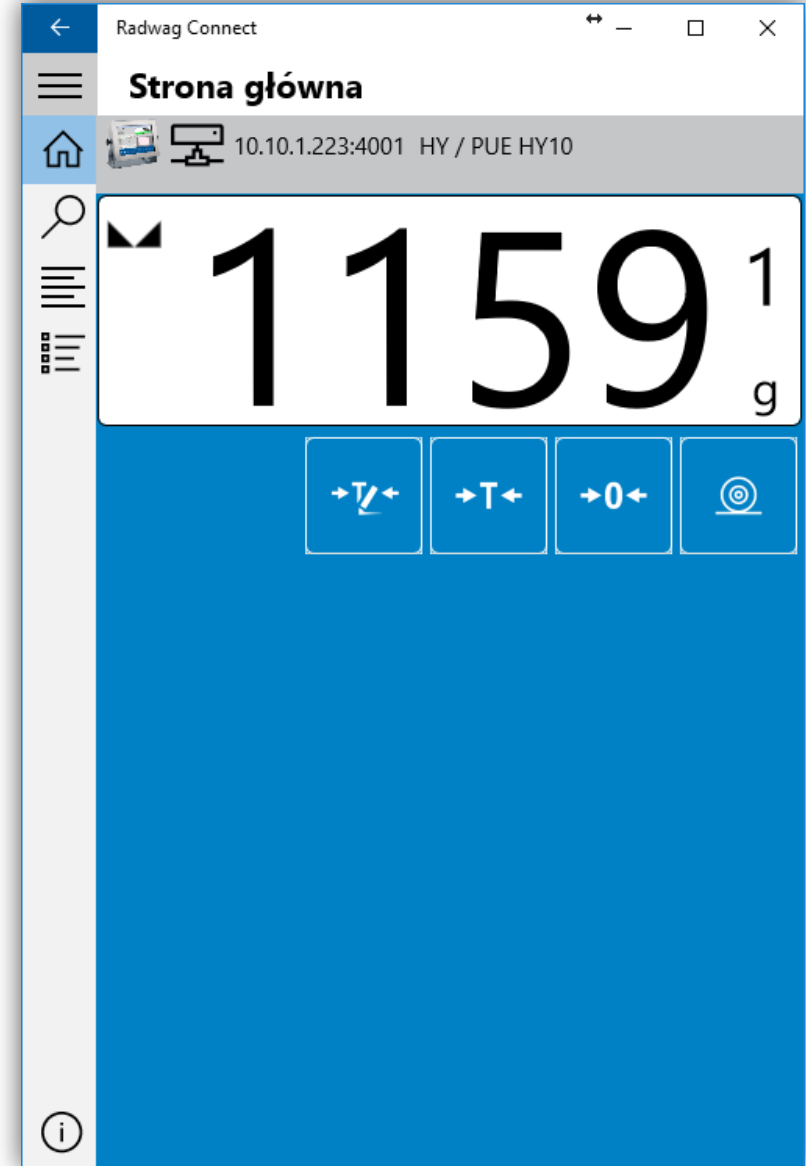

RADWAG Connect WIN10

Functions and possibilities

General information

RADWAG Connect is a new tool intended for mobile devices operation of which is based on Windows 10.

The program can be operated using desktop computers, laptops, tablets, and mobile phones.

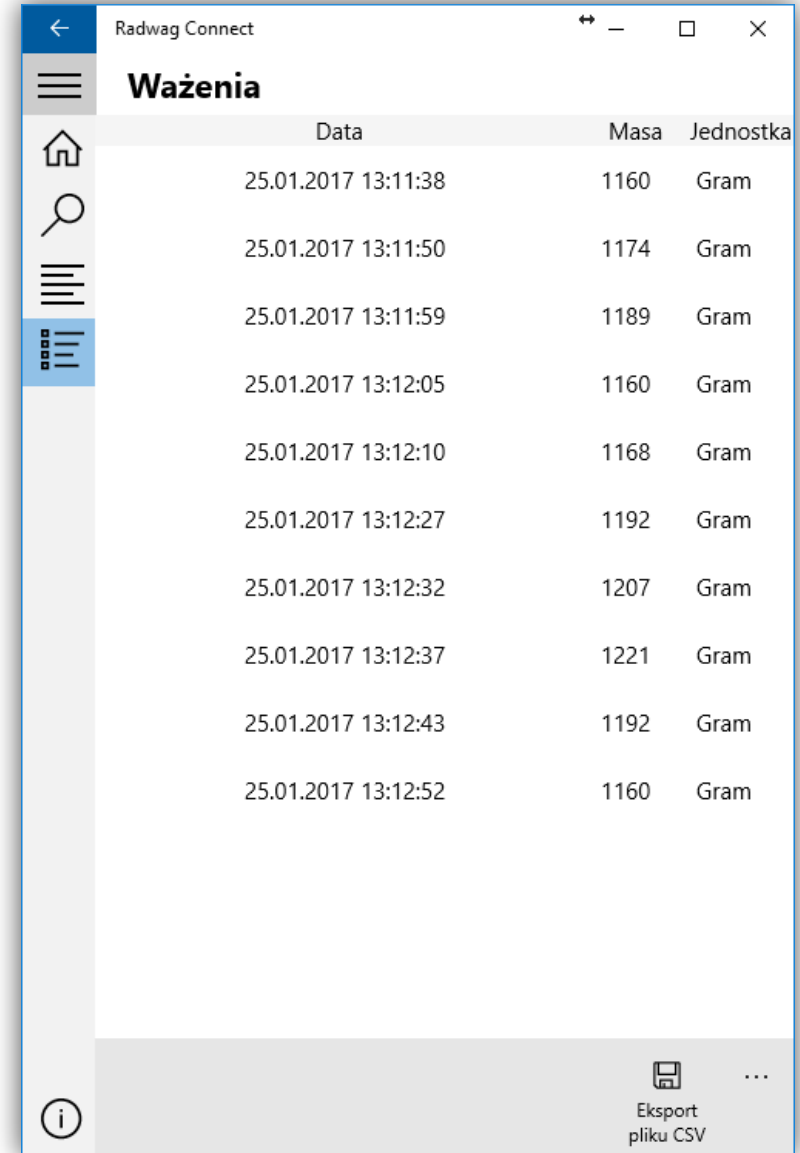

Measurements

Support of basic functions:

- record of current mass,
- taring,
- zeroing.

Recorded measurements can be previewed in a program and exported to CSV file.

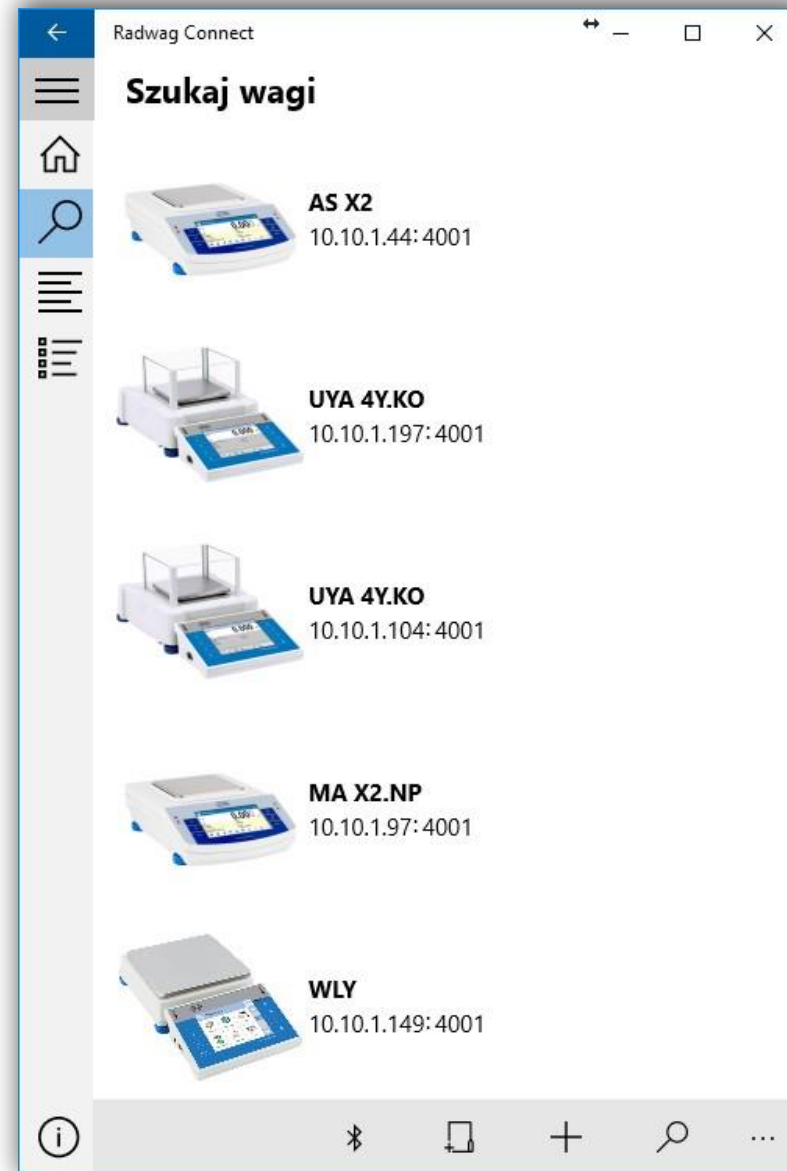

The screenshot shows the 'Radwag Connect' application window. The title bar reads 'Radwag Connect'. The main content area is titled 'Ważenia' (Weighings). It displays a table with three columns: 'Data' (Date and Time), 'Masa' (Mass), and 'Jednostka' (Unit). The table contains ten rows of measurement data. At the bottom right, there is an 'Eksport pliku CSV' (Export CSV file) button.

Data	Masa	Jednostka
25.01.2017 13:11:38	1160	Gram
25.01.2017 13:11:50	1174	Gram
25.01.2017 13:11:59	1189	Gram
25.01.2017 13:12:05	1160	Gram
25.01.2017 13:12:10	1168	Gram
25.01.2017 13:12:27	1192	Gram
25.01.2017 13:12:32	1207	Gram
25.01.2017 13:12:37	1221	Gram
25.01.2017 13:12:43	1192	Gram
25.01.2017 13:12:52	1160	Gram

Communication

The program supports operation of all devices communicating via *Common Communication Protocol*.

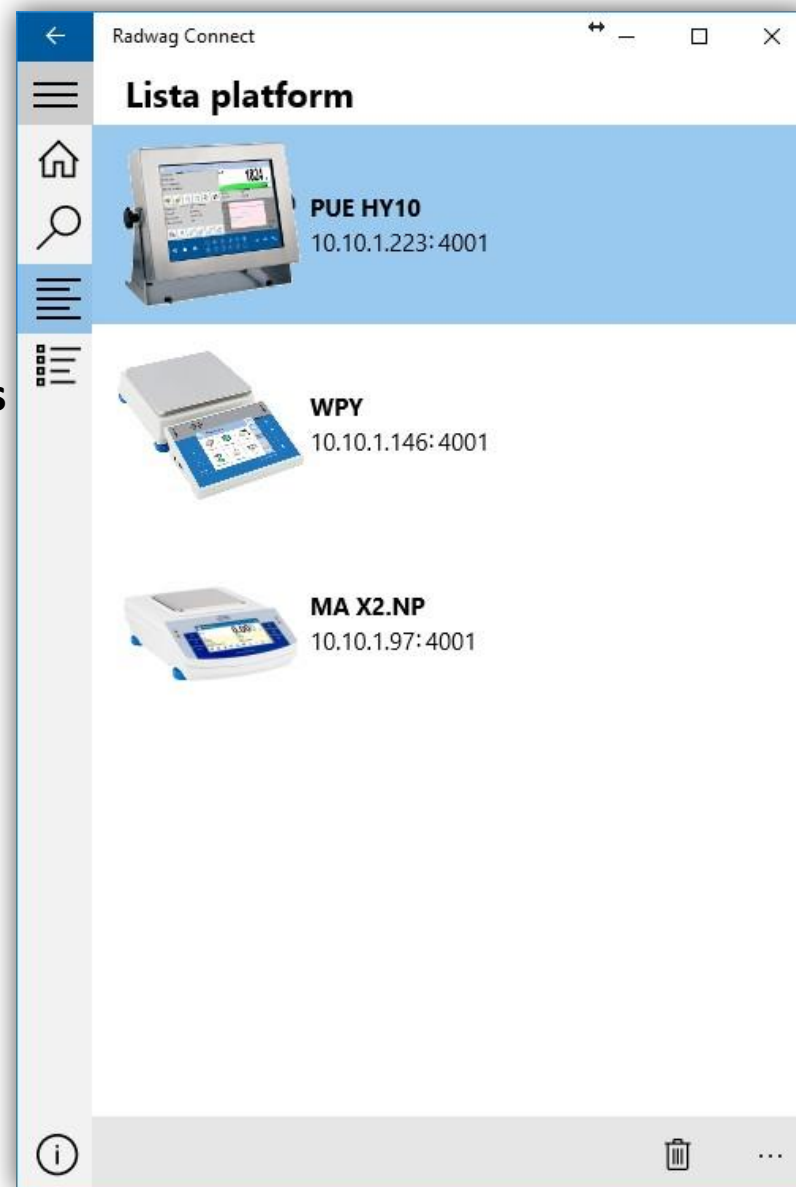

Connection can be established via local network, network-operating devices are searched automatically.

Weighing devices list

Automatically detected balances and scales can be connected with the program. You can connect as many devices as you wish.

You can swap between the devices with just one click.
